Q-34. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오. [3점]

The term “anchoring” was introduced by Roland Barthes who observed that text is often used next to images (his focus was on photographs) to confine meaning. Of all possible literal or implied interpretations an image could elicit, text would point the viewer towards a desired, specific direction. In advertising, as Barthes argues, the symbolic message does not guide identification but interpretation. The viewer is **not asked** to recognize what they see **but to understand** why they see it and what it means to them. By combining images with text, advertising produces symbolic meaning that is accurate and specific on the one hand, richer on the other, **thus adding depth and eliminating breadth** of rational and emotional interpretations. The headline or tagline of an ad directs the reader through the intended meanings of the image, so that _____. It “remote-controls” the reader towards a meaning chosen in advance.
