Q-33. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오. [3점]

Over the last few centuries, humanity's collective prosperity has skyrocketed, as technological progress has made us far wealthier than ever before. To share out those riches, almost all societies have settled upon the market mechanism, rewarding people in various ways for the work that they do and the things that they own. But rising inequality, itself often driven by technology, has started to put that mechanism under strain. Today, markets already provide immense rewards to some people but leave many others with very little. And now, technological unemployment threatens to become a more radical version of the same story, taking place in the particular market we rely upon the most: the labor market. As that market begins to break down, more and more people will be in danger of _____.

collective prosperity 집단적 번영
skyrocket 치솟다, 급증하다
share out 나누어 주다

It's often said that those who can't do, teach. It would be more accurate to say that those who can do, can't teach the basics. A great deal of expert knowledge is implicit, not explicit. The further you progress toward mastery, _____. Experiments show that skilled golfers and wine aficionados have a hard time describing their putting and tasting techniques — even asking them to explain their approaches is enough to interfere with their performance, so they often stay on autopilot. When I first saw an elite diver do four and a half somersaults, I asked how he managed to spin so fast. His answer: "Just go up in a ball." Experts often have an intuitive understanding of a route, but they struggle to clearly express all the steps to take. Their brain dump is partially filled with garbage.

Q-40. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것을 고르시오.

The concern about how we appear to others can be seen in children, though work by the psychologist Ervin Staub suggests that the effect may vary with age. In a study where children heard another child in distress, young children (kindergarten through second grade) were more likely to help the child in distress when with another child than when alone. But for older children — in fourth and sixth grade — the effect reversed: they were less likely to help a child in distress when they were with a peer than when they were alone. Staub suggested that younger children might feel more comfortable acting when they have the company of a peer, whereas older children might feel more concern about being judged by their peers and fear feeling embarrassed by overreacting. Staub noted that “older children seemed to discuss the distress sounds less and to react to them less openly than younger children.” In other words, the older children were deliberately putting on a poker face in front of their peers.

① presence … evaluated
② presence … motivated
③ absence … viewed
④ absence … assisted
⑤ audience … trained

train 훈련하다

① 수동형 동명사 · **being p.p.**

older children might feel more concern / **about being judged** by their peers / and **fear feeling embarrassed** / **by overreacting.**

• **about + being p.p.** : 전치사 about의 목적어는 being judged. 아이들이 평가를「받는」관계이므로 수동형 동명사.

• 능동 → 수동 : their peers judge them → they are judged by their peers → being judged by their peers

② 동명사와 병렬구조

older children / **might [feel** more concern about being judged] / **and [fear feeling embarrassed]**.

• 동사의 병렬 : might가 feel과 fear에 공통으로 걸림.「더 염려하고, 창피해지는 것을 두려워할 수 있다」.

• **fear + -ing** : feeling embarrassed는 fear의 목적어. feel + 형용사로「창피함을 느끼다」.

• **by + -ing** : by overreacting: 과잉 반응함으로써. 타인의 평가와 창피함에 대한 두려움이 행동을 억제함.
